

# PERSIMMON & FIG VARIETIES 2023

## Persimmon

Variety	Fruit & Flavor	Comments	Pollination
<b>Fuyu</b> Jiro Asian	Medium-sized, flattened, round, orange-red fruit w/light orange flesh is firm, crunchy & sweet. Non-astringent.	Grows about 20-30 feet tall. May not reliably set fruit in PNW; site in sunny warm spot.	Self-fertile

## Fig

<b>Desert King</b>	Yellowish green fruit with sweet strawberry-colored flesh.	Early ripening suited to our coastal, cooler regions. Warm, sunny spot for best chance of fruit ripening. 8 to 10 feet tall/wide.	Self-fertile
--------------------	--	---	--------------

<b>Lattarula</b>	Greenish-yellow fruit with sweet honey colored flesh.	Reliable & productive in our area; Warm and sunny site for ripening. Great fresh, preserves, drying. Grows about 8 to 10 feet.	Self-fertile
------------------	---	--	--------------

<b>Olympian</b>	Medium green and purple striped fruit with sweet red flesh.	Excellent for cool summers. Sizeable crop in August. Bears at early age; 4 to 8 ft tall. Found in Olympia, WA.	Self-fertile
-----------------	---	--	--------------

<b>Violette de Bordeaux</b>	Small-medium purple black fruit with strawberry-red flesh; sweet, rich flavor.	May not set fruit reliably in our cooler PNW summers; Site in a warm and sunny spot. Grows about 8 to 10 feet tall/wide.	Self-fertile
