## PLUERRY VARIETIES 2024

**Pluerries are complex fruit hybrids, mainly from Japanese plums and cherries. They have predominantly plum heritage with fruit resembling plums and tasting closer to cherries. They are newer, so if you try one out, let us know what you think!!**

<b>Candy Heart Pluerry</b>	August September	Dark speckled red skin w/ amber-red flesh; "slightly sub-acid and very sweet, with a wonderfully unique flavor"	Heart shaped fruit slightly smaller than a golf ball; extended 'hang time"	Pollinate with another Pluerry or Burgundy Plum
<b>Sugar Twist Pluerry</b>	July	Red fruit with yellow flesh. Complex flavor "cherry sweet with a plum twist".	Newest pluerry; ripens a month earlier than Sweet Treat.	Pollinate with another Pluerry, Flavor King Pluot or Burgundy Plum
<b>Sweet Treat Pluerry</b>	July August	"Combines the sweetness of a cherry with that summer fresh plum zing"	"This precocious and prolific variety will hang on the tree for over a month"	Pollinate with another Pluerry Flavor King Pluot or Burgundy Plum
