

Trees

WHAT DO WE RECOMMEND FOR PLANTING YOUR NEW TREE?

- If your soil needs an amendment, use Bumper Crop Organic Soil Conditioner or Soil Builder and use some of the Soil Conditioner as a mulch after planting.
- Use E.B. Stone Organic Sure Start Fertilizer 4-6-2. Follow the directions on the bag to find the appropriate amount for the size of your tree .
- A yearly mulch of compost, such as EB Stone Planting Compost or Espoma Mushroom Compost, will provide healthy soil for your tree.
- To promote healthy root growth on new trees, try Root Master B-1 Rooting Hormone.
